## Safety Reminder: Beat the Heat

The warm summer sun may seem inviting, but overdoing physical activity during hot weather can cause a plethora of preventable physical ailments such as heat rash, heat cramps, heat exhaustion and heat stroke. Plan ahead when undertaking activities (especially outdoor events), to help keep you and your family safe this summer.

To prevent the onset of these heat-induced ailments, the U.S. Army Center for Health Promotion and Preventative Medicine - Europe recommends the following: **drink plenty of fluids** (as a general guideline, drink two to four glasses (16 to 32 ounces) of fluids each hour during heavy exercise in a hot environment); **replace lost salts and minerals**. (To replace them, drink a sports drink or fruit juice during exercise or while working in the heat.); **do not take salt tablets** unless directed by your doctor; and **listen to your body** (if exertion makes your heart pound and leaves you short of breath or lightheaded, confused or weak, stop all activity and rest in a cool area).

For more about heat safety call the U.S. Army Garrison Stuttgart Safety Office at 421-2752/civ. 0711-729-2752.
